

How to Run the Server in Safe Mode:

- Login with Administrator account to the Server
- Click on **Start** and then Click on **Shutdown** and wait for the system to the shutdown properly.
- Connect a Keyboard, Mouse and a Monitor directly to the Server.
- Press the **Power button** of the Server to Start.
- When you see that the Lenovo screen disappeared in the monitor start pressing **F8 key** in keyboard (Press and release F8 intermittently) to enter into the **Advanced Boot Options**.
- Select **Safe Mode** and press **Enter**. This will open Windows Server 2012 in Safe Mode Wait for few minutes.

- Once the Server start in Safe Mode then on Desktop Background you will you see the Safe Mode was mentioned and the screen will look like as below.
